Drewrys Speed Up Deliveries with INTERNATIONAL TRUCKS

SINCE 'way back in 1877, heavy loads have been hauled away from the big brewery operated in Winnipeg by The Breweries Limited. Through all these years this firm has had a heavy transportation problem to study over, and to solve.

Fortunately, great improvements have been effected in haulage equipment during the last quarter century, so today The Drewrys Limited handles its big daily output of bottled goods with real efficiency and despatch.

In 1935, nearly 50 years after the big brewery first opened, The Drewrys Limited bought an International Truck. The men at the head of the company had heard many good words concerning Internationals, so they decided to give a Speed Truck a chance to prove up in their service. It more than satisfied these careful buyers and won a place for the other Internationals that have been added to the growing fleet.

We are proud of the record of International Trucks with The Drewrys Limited and glad they are doing their part in advancing the success of Drewrys products. In all probability, they would serve your hauling as well. The nearest International Truck branch or dealer will demonstrate suitable models and quote prices and terms on request.

The complete International Truck line includes capacities ranging from $\frac{3}{4}$ ton to 5 tons. All models have 4-wheel brakes.

INTERNATIONAL HARVESTER COMPANY
HAMILTON of Canada, Ltd. CANADA

*A Few Facts About
The Drewrys
Limited*

The Deywys Limited is the oldest
brewery in the West—estab-
lished in 1832.

Whispering plant has a daily capacity of 140,000 berries of hard, dry, green, and soft coconuts.

The largest brewery in Western Canada. Affiliated with the Wm. 410 Bowmans Ltd., operating breweries in Brandon, Moose Jaw, and Saskatoon as well as a soft drink plant in Regina.

Member of the famous "Canada's
Fridge" Jay ginger ale and
Dewey's Beer, Ale and Stout.
A satisfied user of International
Trade since 1973.

The new Kellogg cereal .. so crisp it actually crackles in cream

YOU'VE never known a cereal before like Kellogg's Rice Krispies. It's different in variety, shape and flavor!

Just taste those toasty rice bubbles as they come from the carton. You've never put anything as delicious in your mouth.

Serve them for breakfast. And when you peak on the milk or cream. Listen to them crackle. That's how crisp they are!

Launch—the children's evening meal... you couldn't find a better dish. Add fruits or honey to your Rice Krispies.

Milk crackles with them, mmmmm. Geriatric solids. Put them in soups. Butter and serve like crisp pop corn. There never was a cereal to use in many ways.

Order a red-and-orange package from your grocer. Try Rice Krispies today and your family are in for a flavor surprise!

Notice how long these rich suds last!

And—in machine or tub— lasting suds shorten washday

Millions of washing machines were sold when Chipso became Chipso. Given great credit for its low washday cost. Chipso made its mark on the laundry list. It's the only soap that's so rich it lasts so long. And, you never have to add more soap to the water.

Chipso is so rich and lasting that you can use it in the machine or in the tub. It's the only soap that's so rich it lasts so long. And, you never have to add more soap to the water.

Chipso—quick suds that last. Soaks clothes clean—Dashes less time.

Only when values and traditions are rewarded, can the highest standard of quality continuously be maintained.

Only where where and perhaps are questioned, you the highest standard of quality performance be achieved.

The human element is all important. No other factor—design, engineering, methods or materials—overwhelms its importance in our course books in Packard courses.

And so in Pickard there has been developed an organization of remarkable status, schooled to command of quality and knowledge—the highest. Thousands of Pickard craftsmen have been in their shops for five and more years—hundreds speak of a decade. Their loyal and intelligent co-operation has helped immeasurably to build Pickard's production organization for continuous leadership in the fine car field.

Fire stone

Reaches around the World to Give

Here are world-wide resources - gigantic enterprise - skilled organization - destined to the practical task of delivering the product in large quantities. - Always say in Liberia, Firestone, coming to inaugurate a million acres into cultivated rubber plantations. - Buyer of history when so many rubber trees planted by one organization in an equal length of time. - Over in Singapore are vast rubber plantation plants - modern in the highest degree - Firestone's plant and operated.

Most Miles per Dollar

to bring the finest rubber at the lowest cost to five great Firestone factories. - With the world's largest exclusive tire factory and the world's largest cotton fabric mill. - Firestone's biggest large-scale customer which not only receives and by the way, Firestone's own shipped tires - from raw material to finished product - direct shipping - direct shipping - direct distribution from factory to consumer throughout the world. Firestone's tires are everywhere. Firestone saves you money and serves you better.

Build the Endurance Tractor

Here are the instructions for making a replica of the world's longest flying model plane

By MURRILL HAMBURG

WANT to build an endurance model airplane that will fly values in an endurance race? Then prepare and build:

First, the day—the entire tractor is built from one piece of balsa wood. The fuselage is cut from a single strip of the material before you have to cut anything. The landing gear is cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood. The entire tractor is built from one piece of balsa wood.

First of all, study the drawings. Remember, as you work, this is a simple model and does not require the high endurance or precision of a real model with a motor.

Start with the motor and the fuselage. Figure 1 shows a 1/2 inch strip of balsa wood 1/2 inch by 1/2 inch. If the motor is a variable motor, it may be a 1/2 inch strip of balsa wood. If the motor is a fixed motor, it may be a 1/2 inch strip of balsa wood. The motor is cut from a single strip of balsa wood.

The fuselage is cut from the balsa wood 1/2 inch by 1/2 inch. It is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood.

Your work shop is to be the motor. The motor is cut from a single strip of balsa wood. The motor is cut from a single strip of balsa wood. The motor is cut from a single strip of balsa wood. The motor is cut from a single strip of balsa wood.

Next, the wings. The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood.

The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood.

Next, the tail. The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood.

Finally, the landing gear. The landing gear is cut from a single strip of balsa wood. The landing gear is cut from a single strip of balsa wood. The landing gear is cut from a single strip of balsa wood. The landing gear is cut from a single strip of balsa wood.

by taking of which the motor is cut from a single strip of balsa wood. The motor is cut from a single strip of balsa wood. The motor is cut from a single strip of balsa wood. The motor is cut from a single strip of balsa wood.

The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood.

The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood.

The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood.

The landing gear is cut from a single strip of balsa wood. The landing gear is cut from a single strip of balsa wood. The landing gear is cut from a single strip of balsa wood. The landing gear is cut from a single strip of balsa wood.

The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood.

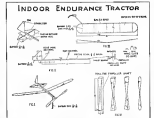

The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood.

The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood.

The other endurance tractor. A plan of this type tractor, the world's longest flying model plane.

are built of the balsa wood. The motor is cut from a single strip of balsa wood. The motor is cut from a single strip of balsa wood. The motor is cut from a single strip of balsa wood. The motor is cut from a single strip of balsa wood.

Keep these drawings when you cut each piece out in the construction of your plane and you will have a fine model to build. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood.

the fuselage of the tractor is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood. The fuselage is cut from a single strip of balsa wood.

The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood. The wings are cut from a single strip of balsa wood.

The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood. The tail is cut from a single strip of balsa wood.

22% MORE POWER

5 MILES AN HOUR MORE SPEED

2 EXTRA MILES FROM EVERY GALLON OF GASOLINE

ANYONE who has had as much experience with gasoline motors as the men on the firm should be very much interested in this explanation of Nash Twin-Ignition motor performance.

Instead of a single spark plug in each cylinder, Nash engineering uses two big aircraft-type spark plugs, firing simultaneously, to obtain a much quicker, much more thorough and more efficient combustion of the gas. This makes higher compression practical.

The result is, that the identical Nash motor, with Twin Ignition instead of the ordinary single ignition, produces, by actual test, 22% more power, 5 miles per hour more speed, and gives you 2 extra miles from every single gallon of gasoline you buy.

In fairness to yourself, do not think of buying any motor car today until you have driven the new Twin-Ignition-Motored NASH "400".

LEADS THE WORLD IN MOTOR CAR VALUE

Getting the Propeller

There is a drawing of a propeller in the text. The propeller is cut from a single strip of balsa wood. The propeller is cut from a single strip of balsa wood. The propeller is cut from a single strip of balsa wood. The propeller is cut from a single strip of balsa wood.

LONGER LIFE for your clothes

Jacobs equipment delicate enough to smooth cheap tissue paper without tearing, was demonstrated to Alice Gardley on her interesting tour via Landlord's.

"These large machines are for fast work," an attendant explained.

"Later you will see where the appeal is reaped on nicely-padded prams."

Modern laundries have special equipment and methods for handling the most delicate garments. "Why, that equipment does better sorting with less wear on clothes than my own laundress!" Alice declared. In your city modern laundries offer a variety of services. You will find one that exactly meets your needs—and your family budget.

Go Wash Alone
At a Laundroid
Ask your modern laundress for the delightful journey book of "A Love in Laundroid!"
A telephone call will bring your copy.

A Service for Every Family Budget

Whether you are a busy mother or a homemaker, you will find a Laundroid a most helpful service. It is a place where you can get your clothes washed and pressed in the most efficient and economical way. It is a place where you can get your clothes washed and pressed in the most efficient and economical way.

Laundroids are a most helpful service. They are a place where you can get your clothes washed and pressed in the most efficient and economical way. They are a place where you can get your clothes washed and pressed in the most efficient and economical way.

Let the LAUNDRY do it!

Courtesy the author of all knowledge; and the inquisitive child must always resort to his book.

ID GIVE anything if there was only somebody who had said "yes" to all my questions. I am sure that I could find out everything I wanted to know. I could find out how the world was made, and how the sun and the stars were made. I could find out how the world was made, and how the sun and the stars were made. I could find out how the world was made, and how the sun and the stars were made.

"Why don't you ask Daddy?" he says to me. I don't want to ask Daddy. I want to know everything. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made.

"But of all the questions which I can ask, I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made."

"Why do I think I can't ask Daddy?" he says to me. I don't want to ask Daddy. I want to know everything. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made."

When Children Ask Questions

They are wise parents who always strive to answer their child's questions simply and honestly

By MABEL CREWS RINGLAND

"Don't tell me this story!" I say to my husband, and try my best to put a stop to the whole business by taking out my newspaper and reading it to myself. I am sure that I can find out everything I want to know. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made."

"But of all the questions which I can ask, I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made."

"But of all the questions which I can ask, I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made."

"But of all the questions which I can ask, I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made."

"But of all the questions which I can ask, I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made. I want to know how the world was made, and how the sun and the stars were made."

You Can Increase Your Life Insurance Now

A plan has been worked out which enables the financial difficulties which occur to leave as large as an estate to adequate protection for your loved ones.

The "Life Protector" Plan of the North American Life Co. is the best plan. It offers you three new definite advantages:

- (1) An exceptionally low premium for a period of seven years to offset the discount.
- (2) The option, at the end of seven years, of either an increase or payment of a highly higher premium.
- (3) The option, at the end of seven years, of either an increase or payment of a highly higher premium.

If you delay, life insurance will cost you increasingly more at every year's end. But the time you need it, it tends to be most unaffordable. But, in good physical condition, an today taking advantage of this wonderful "Life Protector" Plan. Can you qualify?

A One-time stake in large real estate investment is a limited share of the company's profits.

One is a low level stock in a company of building up capital and future income.

As a rule, large funds seldom pay to invest the possibility of coming capital.

It is better to invest in large funds (usually in the form of a company) and let the fund invest in real estate and other property.

It is not as if the fund is to be used as a source of funds for the company. It is to be used as a source of funds for the company. It is to be used as a source of funds for the company.

Financial Queries

Question—I have at present £2000 shares of Equity Consolidated Assurance Co. of London. I am now thinking of buying a few more shares to reach a long bid. Please give me an opinion of the possibility of this share rising in value. I am also thinking of buying a few more shares to reach a long bid. Please give me an opinion of the possibility of this share rising in value.

ON THE TABLES OF AMERICA'S FIRST FAMILIES SINCE

LEGACY JELLY SERVER, \$2.00 EACH; PIECES OF 8, (TRADE MARK REGISTERED) 24 PIECES OF FLATWARE, IN CHEST, \$51.35... 3-PIECE TEA SET \$17.75

PIECES OF 8 IN THE MODERN MANNER!

The "treasure-hunter" of 1929 wears Paris frocks... Her ideas are new. Her viewpoint is modern. But in her silver tastes, she resembles Captains Kidd and Morgan. She, too, likes PIECES OF 8... So, for this modern treasure girl, there is a modern PIECES OF 8... with eight of each in gleaming knives, forks and spoons, instead of the usual short-handed sixes. And priced at only \$51.35, for the service complete... And also, for her, there is a modern silverware pattern in both flatware and hollowware. A new pattern, called LEGACY, with the crisp, swift, geometric lines of the art *moderne*... Genuine 1847 ROGERS BROS. quality, respected as the finest for more than eighty years, and guaranteed without time limit. You can see this new 1929 PIECES OF 8 set at any silverware counter, or write for booklet C-10 to Dept. E, International Silver Company of Canada, Limited, Hamilton, Ontario.
